2017: THE YEAR OF OPTIMISM

The New Year brings us a new president and administration touting the platform of revitalizing America to greatness. Here's what president-elect Trump shared during his victory speech:

"We are going to fix our inner cities and rebuild our highways, bridges, tunnels, airports, schools, hospitals. We're going to rebuild our infrastructure, which will become, by the way, second to none. And we will put millions of our people to work as we rebuild it."

CONCRETE ESSENTIAL TO REBUILD

Concrete is one material at the core of rebuilding our nation's infrastructure, making the 2017 WOC trade show an important event to attend. There's something for everyone,

including The **Producer Center**, a marketplace of materials, equipment, demos, and seminars for concrete producers; **Material Handling**, offering trucks, excavators and more for material delivery, distribution, concrete placement, and earth moving; **Concrete Repair & Demolition**, housing a display of surface preparation equipment, scarifying, grinding, sawing equipment, and other demolition products; **World of Masonry**, showcasing products, tools, information, and technology for masonry professionals; **Technology for Construction**, featuring the newest products and tools for the commercial construction industry from top information technology and systems providers; **Concrete Surfaces & Decorative** showcasing the popularity of decorative concrete for both commercial and residential applications; and **Precast** highlighting the latest products and technologies in the precast/prestressed sector.

Turn the page for a sneak peak at some of the products you'll see at the Show. 

ACCEPT NO SUBSTITUTE

100+ SEMINARS • HANDS-ON TRAINING • TRAIN-THE-TRAINER • MASTER CERTIFICATES • INTERACTIVE WORKSHOPS

It's a fact: The most effective education program in the industry is at World of Concrete. Use it to equip yourself with the information—and certification—you need to stay at the top of your game and profitable in the modern concrete marketplace. Explore the latest innovations in technology, materials, techniques, and equipment and learn why there is absolutely no substitute for a WOC Education.

At World of Concrete, **KNOWLEDGE IS KING.**
Register and plan your seminar schedule today.

AIRO INDUSTRIES, INC.

LTD® (Load-Lifting Transfer Deck)

The LTD® Hoist Series solves all timing issues involving tower cranes and other hoisting options. The LTD lifts up to 17x faster than all other means at an average cost of \$12 per pick. Since it lifts straight up and down, it only requires a small safety area, easily marked off. This makes the LTD extremely economical and safe, while lowering the labor cost, by delivering construction material to the work force faster, which significantly reduces "lost" labor hours waiting for construction material. Sites that have used the LTD have finished construction 33 percent sooner than they would have without the LTD.

DIGGA NORTH AMERICA

Bigfoot Trencher

The Digga Bigfoot trencher features an adjustable skid foot with pre-set digging depths. When placed correctly on the ground, the foot places the spoil auger in the ideal clearing position. Too low and it digs into the ground robbing the trencher of power; too high and the trench doesn't clear efficiently slowing work down. A heavy-duty crumber bar allows the operator to start trenching with the crumber in the engaged position, eliminating the need for the operator to get out of the machine to set it once trenching depth has been achieved. Trenchers are available for skid steer loaders, excavators, and backhoes up to 8 tons. Two models are available, depending on application and machine size, with depths up to 60 inches and widths to 12 inches.

DY CONCRETE PUMPS INC.

Concrete Pump 38X-5ZR

DY Concrete Pumps is excited to announce the North American debut of the 38X-5ZR Concrete Pump at the 2017 World of Concrete. The 38X-5ZR's jobsite-friendly, 360-degree continuous swing ZR boom configuration and X-Style outrigger design is a must-have addition to your fleet. Perfect for both commercial and residential jobsites, the 38X-5ZR will increase your company's fleet utilization with its operator-friendly controls and low maintenance design. Be sure to check out the 38X-5ZR along with the 33X-5ZZ, 43X-5RZ, and 57S-6RZ at the 2017 World of Concrete.

HITCHDOC MANUFACTURING

Dual Dozer

The HitchDoc Dual Dozer will save time, material, and produce correct concrete thickness; all by higher accuracy in subgrade surface leveling. Our system can be outfitted for laser, sonic, slope sensing, GPS, or 3D electronic systems and are coupled with the flexibility and productivity of leveling forward or in reverse in your skid steer or tractor. HitchDoc is an ISO 9001 certified manufacturer located in SW Minnesota. HitchDoc designs and manufactures a quality product portfolio that spanning ag, construction, industrial, municipalities, recreation, and utility vehicle accessory industries with American-made materials.

INSITE SOFTWARE, INC.

SiteWork Earthwork & Utility Estimating Software

Provides cut and fill and sanitary and storm take-offs from vector files (PDF and CAD), image files (PDF, TIF, and JPG files) or data collector (GPS, total station). It's totally portable with no digitizer to tie you down. A coordinated cursor between the zoomed take-off window, a site overall, and 3D Live provides instant validation that your take-off is correct. Select contours, including dashed existing lines on vector PDFs without tracing. Snap to building corners and curbs for CAD-like accuracy and align multi-page documents. Take a virtual drive through the site.

L.B. WHITE COMPANY, INC.

Tradesman 125 Portable Forced Air Heater

L.B. White Company, Inc. introduces the newest propane-fueled Tradesman 125 portable forced air heater. Designed from the ground up to be the contractor's first choice for jobsite heating. The output ranges from 70,000 to 125,000 Btu/h. with 400 CFM of airflow. Variable output means fuel savings on the job, and this heater is direct fired, with 98-percent-plus combustion efficiency. As durable as it is economical, the new Tradesman 125 comes with the industry leading 2-year warranty and it is certified to meet or exceed CSA standards.

LIGCHINE INTERNATIONAL

ScreeDSaver BOSS 240

The ScreeDSaver BOSS 240 will be the focus in Ligchine International's 2017 World of Concrete booth. The innovative BOSS 240 features mega screed production with an 18-foot boom reach equipped a 13.5-foot screed head resulting in 240 square feet per screed pass. A 360-degree pivoting undercarriage allows for zero turn navigation and ability to screed in the tightest of jobsites. Ligchine International will also have the entire ScreeDSaver line of boom-operated screed machines displayed along with the BOSS 240 at the 2017 World of Concrete.

MAX USA CORP

MAX Rebar Tier RB398

The lightweight compact bodied MAX RB398 rebar tier takes less than one second to tie each rebar intersection, significantly reducing tying time and reducing stress on the contractor's body. The RB398 uses 21-gauge wire and ties #3x#3 to #5x#6 rebar. Its lithium-ion battery has the power to tie 2,600 times per charge, recharges in approximately 40 minutes, and the tool produces approximately 120 ties per coil. The brushless twisting motor on the RB398 offers higher efficiency, longer motor life, and reduces service issues related to brush erosion or dirt on the commutator.

OZTEC INDUSTRIES, INC.

RebarShaker

The patented Oztec RebarShaker is the most efficient and cost-effective method of consolidating grout or concrete in blockwall cells, columns, or walls. The RebarShaker simply slipped over the top of the rebar turns the entire length of rebar into a vibrator. This unique method greatly reduces human error and poor vibrating technique, saving the time of filling and refilling cells, while producing practically void-free results. The vibrator substantially cuts work time and eliminates the mess and cleanup necessary with conventional methods.

PACKER BROTHERS

Arrow Master's Hammer-Compactor

The Arrow Hammer 1350 is a versatile, highly productive concrete breaker and soil compactor. Featuring a John Deere diesel engine and patented Creeper Drive mode, the Arrow Hammer breaks, cuts, scores, and compacts trenches like no other. With an impact energy of 13,000 lbs, no concrete, rock, or asphalt will stand in this machine's way. This monster compacts soil in layers of 3 to 6 feet at 95 to 100 percent efficiency for foundations and trenches. Arrow Hammers will increase productivity and the difference will be seen in your bottom line.

PIERTECH SYSTEMS

Helical Piers, Piles, and Helical Equipment

PierTech Systems continues to innovate the Helical Foundation Industry. PierTech offers excellent customer service through innovative products, quality manufacturing, and an attentive knowledgeable team. PierTech Helical Piers range from 1½ inches to 60 inches O.D., with load capacities exceeding 500 tons. PierTech sells Helical installation equipment and accessories. PierTech's Anchor Drives boast torque outputs of up to 360 K foot pounds. PierTech has also introduced the innovative Cross Lock connection. The patented Cross Lock offers instant alignment, cutting installation time in half, while bolts see zero torque, eliminating hole elongation and decreasing deflection.
