

Come visit with the crew of **Modern Contractor Solutions** at ConExpo **Booth GL31201**.

See you in Vegas!

Here are some of the companies you'll see at the Show...

ALPINE EQUIPMENT

ConExpo will feature several units from our Alpine Equipment's premier Rockwheel product line. Rockwheels are the most modern, durable, and productive hydraulic rotary cutters on the market. We offer a range of products for excavators of every size category from 2-100+ tons. The tremendous torque and cutting forces provide cutting rates 2-5 times that of hammers in suitable rock while offering precision that is simply not possible with other tools. Equally useful in rock or concrete, this is a tool every serious excavation company should have in their toolbox. See for yourself the product that is turning traditional rock excavation upside down. Dealership opportunities.

ANTRAQUIP CORPORATION

Antraquip's rock and concrete grinders are suitable for trenching, controlled demolition, scaling, soil remediation, tunneling, underwater cutting, and general rock excavation. Numerous models are available for excavators ranging from 2 to 110 tons. Choice of cutter head styles to suit the application. AQ line equipped with a high-torque, low-speed hydraulic motor with rugged gearing and symmetrically aligned cutter bit patterns insures maximum productivity.

BKT USA, INC.

BKT MAGLIFT has been designed for forklifts as it features high load capacity. Its reinforced structure eliminates slippage risks while the special bead shape simplifies the mounting operations on the rim. MAGLIFT shows an excellent cut and chip resistance resulting in an extended tire lifecycle. It is also available in a "lip" version. Stop by the BKT booth to view the MAGLIFT along with tires from the Earthmoving, Port, and ATV lines.

ConExpo Booth C22020

DIGGA NORTH AMERICA

The Digga Bigfoot trencher features an adjustable skid foot with pre-set digging depths. When placed correctly on the ground, the foot places the spoil auger in the ideal clearing position. Too low and it digs into the ground robbing the trencher of power; too high and the trench doesn't clear efficiently slowing work down. A heavy-duty crumber bar allows the operator to start trenching with the crumber in the engaged position, eliminating the need for the operator to get out of the machine to set it once trenching depth has been achieved. Trenchers are available for skid steer loaders, excavators, and backhoes up to 8 tons. Two models are available, depending on application and machine size, with depths up to 60 inches and widths to 12 inches.

EBERSPAECHER CLIMATE CONTROL SYSTEMS

Espar's pre-heaters are capable of heating systems from small non-mobile equipment and light trucks all the way up to 2,500+ hp diesel engines. With this warmed engine coolant, other system fluids, hydraulic oils and fuel, can be heated to ensure usability in the most demanding weather. Espar's forced air heaters can provide economical heat for operator cabs and truck sleepers all the way up to cargo and workspace heating. Ample amounts of heat allow operators and technicians to function safely and efficiently in winter environments.

EFFICIENCY PRODUCTION, INC.

Efficiency Production, Inc., "America's Trench Box Builder™," provides the widest selection of standard and custom trench shielding and shoring systems, including: steel and aluminum Trench Boxes and Manhole Shields; the industry leading Build-A-Box™ Aluminum Modular Trench Shielding System; plus Hydraulic Shores, Rescue Shores, Hi-Clearance Shores, and Hydraulic Aluminum Shields. Efficiency Production also manufactures America's PREMIER Slide Rail System, supported by the company's *Special Operations Shoring Division*; the nation's most experienced team of Slide Rail experts and installers. Efficiency's versatile products are designed specifically for safe and cost effective installation of utility systems and infrastructure improvements. All products are P.E. certified to meet OSHA standards.

FAE USA INC.

UML/S/EX-150 VT is the new high-performance excavator forestry mulcher from FAE that fits excavators 20-25 tons, requires flow of 40-80 gpm, and a psi range between 3200-600. Available in working widths of 53 and 63 inches, it is capable of mulching material up to 12 inches in diameter. This innovative and highly productive machine comes standard with double carbide teeth; however, multiple tooth options are available based on customer's application. FAE offers a full range of excavator forestry mulching heads for 1 to 30 ton excavators, as well as custom-made mulching heads for excavators up to 40 tons. FAE's patented rotor system allows higher productivity, finer final product, and less fuel consumption.

HEADWATERS RESOURCES

Supplementary cementitious materials, such as fly ash and slag recovered from coal-fired power plants, have been used for years to reduce the amount of cement required to complete a project while improving the overall durability of the concrete system. As part of our long-term sustainability initiatives, Headwaters, America's largest manager and marketer of coal combustion products (CCP), is working to store and reclaim greater amounts of fly ash. While not all of the disposed CCPs can be recovered and used productively, we forecast 150,000 to 250,000 tons of new fly ash from storage and reclamation in 2017.

ConExpo Booth S60807

HITCHDOC

HitchDoc introduces its new Push-Off Bucket HB100. At 84 inches, the bucket has a fast dump cycle; no more shaking the bucket to remove sticky material. This enables operators to get material in the center of loaded trailers, dumping 2-3 feet higher than a conventional bucket. The HB100 is made from high strength steel, powder-coated, greased pivots, and replaceable wear parts. Operators can move high volumes of material in reduced time and fill in trenches without raising the bucket. Trailer boxes can be loaded without risk of damaging side walls and loading higher side wall trailers are not a problem.

INSITE SOFTWARE, INC.

InSite SiteWork Earthwork & Utility Estimating Software provides cut and fill and detailed sanitary and storm take-offs from PDF and CAD files. Work anywhere while saving on plan fees, with no digitizer to tie you down. Select contours, including dashed existing lines on vector PDFs, without tracing. Snap to building corners and curbs for CAD-like accuracy. Align multi-page documents with ease. InSite's 3D Live provides a coordinated cursor between the take-off and 3D to provide instant validation of the take-off.

ISUZU MOTORS AMERICA, LLC

Isuzu Diesel introduces a complete line of Tier 4 and beyond Diesel Engines under Isuzu REDTech™ branding. Known for their Reliable, Eco-friendly, Durable, and Technologically Advanced power solutions all over the world. A history of more than 20 million applications with power outputs from 10 to over 500 hp. These engines are fine-tuned and can be customized to exact customer requirements. All supported by a Distributor Network and over 300 Service Dealers in the Americas for industrial and commercial applications. Shown here is the 4LE2 PowerUnit.

JUNIPER SYSTEMS, INC.

Juniper Systems newest products include: The Mesa 2, a rugged Windows 10 tablet designed for extreme environments. The Mesa 2 has the computing power necessary for all types of construction and BIM jobs, and can perform double-duty as an office computing solution when used with the new Mesa 2 Desktop Dock. For Android app users, the new CT5 Rugged Smartphone provides a bright display with all day battery life in a durable IP68 housing. The New CT7G Rugged Tablet provides an Android platform for field apps requiring a larger display. Also on display is the new Geode Real-Time Sub-meter GPS receiver, designed to provide precise mapping data for multiple platforms.

KOBELCO CONSTRUCTION MACHINERY USA

KOBELCO USA will display a total of 21 excavators at ConExpo 2017, including: an expanded compact excavator line. These models pack full-size performance into a portable package and feature a new 3-year/3,000-hr warranty. New and enhanced SR Series. KOBELCO SR excavators showcase the exclusive iNDR Cooling System and NEXT-3E technology. Revolutionary Generation 10 excavators. The KOBELCO Generation 10 feature increased power and fuel efficiency capabilities to make downtime a thing of the past. KOBELCO will also showcase various specialty machines for demolition and forestry, a patriotic wrapped excavator, and the company's latest technologies in efficiency, safety, machine control and more.

ConExpo Booth N10002

MAX USA CORP

The lightweight compact bodied MAX RB398 rebar tier takes less than one second to tie each rebar intersection, significantly reducing tying time and reducing stress on the contractor's body. The RB398 uses 21-gauge wire and ties #3x#3 to #5x#6 rebar. Its lithium-ion battery has the power to tie 2,600 times per charge, recharges in approximately 40 minutes, and the tool produces approximately 120 ties per coil. The brushless twisting motor on the RB398 offers higher efficiency, longer motor life, and reduces service issues related to brush erosion or dirt on the commutator.

MULTIONE

MultOne is a high-quality multifunctional compact mini loader distributed all over the world and manufactured in Italy. We are now introducing redesigned machines to the US market with larger cabs and increased power. More than 180 specifically engineered attachments can be quickly changed for a variety of applications. Machine sizes range from 20 hp all the way up to 78 hp. We are currently establishing our dealer network throughout the US and North America.

OZTEC INDUSTRIES, INC.

The Oztec RebarShaker® is a revolutionary concept and product that evolved from the specific needs of the concrete industry. The RebarShaker turns the entire length of rebar into a vibrator and consolidates concrete in both walls and columns better than any other method while ensuring a void free result. The RebarShaker simply slipped over the top of the rebar, vibrates, and consolidates grout in 5 to 7 seconds, eliminating mess and substantially cutting work time and cleanup.

PIERTECH SYSTEMS

PierTech Systems continues to innovate the Helical Foundation Industry. PierTech offers excellent customer service through innovative products, quality manufacturing, and an attentive knowledgeable team. PierTech Helical Piers range from 1½ inches to 60 inches O.D., with load capacities exceeding 500 tons. PierTech sells Helical installation equipment and accessories. PierTech's Anchor Drives boast torque outputs of up to 360 K foot pounds. PierTech has also introduced the innovative Cross Lock connection. The patented Cross Lock offers instant alignment, cutting installation time in half, while bolts see zero torque, eliminating hole elongation and decreasing deflection.

POSEIDON BARGE

Poseidon Barge sells and leases Portable Steel Sectional Barges to the Heavy Highway, Bridge, and Marine construction industries. Poseidon offers 4 ft tall pontoons, 5 ft, 7 ft, and 10 ft tall units. Modular Steel Sections pin together in the water to float cranes, excavators, manlifts, and dredging equipment. Poseidon also offers Spud Winch Systems and Hydraulic Sea Bees used position the deck at the jobsite. Customs equipment can be designed and built to customer specs. Poseidon has distribution locations in Fort Wayne, Indiana; St Louis Region; Wilton, New York; Cocoa, Florida; and Belle Chase, Louisiana.

QUALITY MAT COMPANY

Quality Mat Company introduces Q-Core, crane mats engineered and manufactured with characteristics to perform on critical lifts with extreme weights or loadings. The patented Q-Core steel frame technology is built to last, maintaining its structural integrity well beyond the project duration. Some features and benefits: consistent mat-to-ground contact, minimizes repair and replacement cost, eliminates open notches as trip hazards, engineered structure, certified overhead D-rings for lifting, lightweight and reduced freight, and reliability in calculations. Q-Core is built to last for the heaviest tasks. Job after job.

SOLESBEE'S EQUIPMENT & ATTACHMENTS LLC

Solesbee's Equipment & Attachments LLC specializes in standard and custom attachments for heavy equipment. We offer a complete line of top quality attachments for every type of job. Our attachments are strong and durable, and provide years of dependable service. Our goal is to exceed your expectations by providing innovative product solutions for the heavy construction industry. We deliver consistent quality, on-time availability, and maximized equipment performance—guaranteed! Let our experienced staff show you why Solesbee's Equipment & Attachments LLC is the industry leader in heavy equipment attachments.

STRIKER HYDRAULIC BREAKERS

The Striker TNB Hydraulic Breaker offers high-impact energy, long-life operation with lower operating costs. We offer a complete range of 15 models based on the same design philosophy of only two moving parts and "accumulator free technology." These Breakers are not sensitive to system back pressure and can be powered by a wide variety of carriers. With Striker's innovative side plate and bracket system, a breaker can be moved from one machine to another with a simple pin and bushing change to get more return on your investment. The TOKU trademark has become a symbol for quality products worldwide with its exceptional customer service and product support.

TOWMASTER, INC.

Towmaster will be highlighting some of its most popular flatbed equipment trailers at this year's ConExpo. Known for heavy-duty tag trailers, we will also be highlighting our heavy equipment hauling detachable gooseneck trailers. Professional haulers love Towmaster trailers because they are easy to use, easy to maintain, and hold their resale value. Minimal downtime means more money in their pockets and Towmaster trailers are durable enough to withstand the rigors of daily hauling. This same quality goes into our detachable gooseneck trailers. Stop by our booth and see first-hand the quality Towmaster puts into every trailer we build.
