

CONEXPO-CON/AGG LAS VEGAS CONVENTION CENTER MARCH 4-8, 2014

CONEXPO-CON/AGG will unveil the newest equipment, technology, and product breakthroughs in construction.

Featuring:

- 2,400 exhibitors showcasing new products and technologies from for every major construction industry.
- Over 125,000 attendees that range from contractors, to dealers and distributors, to service providers, engineers, producers, municipalities, and more.

SEE MORE, WALK LESS

ConExpo will have new Navigation Programs with guaranteed less walking! New services will include a superior shuttle service, enhanced mobile navigation app, knowledgeable on-site guides to help answer any questions, and new internal routes get you from one product area to another much faster.

- NEW Platinum Lot located directly across from South Hall
- NEW Demolition and Recycling Pavilion

Stop by *Modern Contractor Solutions* Booth #40668 and visit with the sales crew. This is the last opportunity to register for a chance to win the "Tools of the Trade" prize package giveaway.

Turn the page for a sneak peak of some of the exhibitors that will be at ConExpo 2014!

ALPINE EQUIPMENT

Serves North America with the industry-leading RockWheel rock and concrete grinder. These powerful attachments, ranging in size to fit skid steer loaders to the largest excavators, are the ideal rock trenching and concrete scaling tools. The Alpine RockWheel is in use worldwide in mining, tunneling, scaling, demolition, trenching, and underwater applications. Alpine Equipment offers competitive lease and purchase rates, service, and spare parts.

BCT BENEFITS

Provides Supplemental Unemployment Benefit (SUB) Plans to its members who work on prevailing wage jobs. BCT Benefits helps contractors comply with prevailing wage laws, while providing employees with a robust fringe benefits program that offers them income during periods of unemployment. Maintain margins, reduce taxes, overhead, expenses, and get a competitive edge on your bids. Better yet, your employees receive a safe, risk-free and accessible trust account to draw upon when hard times occur.

EFFICIENCY PRODUCTION'S BUILD-A-BOX™

Efficiency Production—America's Trench Box Builder™—is proud to unveil its latest innovative accessory to its industry-leading Build-A-Box™ modular trench shielding system. The new Build-A-Box™ Sheeting Guide Frame utilizes lightweight corrugated sheets of aluminum to shore closely around existing cross-trench utilities. The sheets can be installed by hand, and the guide frame panel integrates seamlessly into any Build-A-Box configured system. The result is a safe, maintained trench or pit that allows workers to access existing utilities.

ENERPAC

The global leader in high-pressure hydraulic solutions, Enerpac will demonstrate the amazing lift capability of the SBL100 Hydraulic Gantry. This is the first time this product will be on display in the U.S. This gantry system provides a safe, efficient way to lift and position massive loads in applications where traditional cranes will not fit. This three-stage gantry is currently the largest in Enerpac's range and it has unique features, such as a foldable boom that facilitates easy transportation. Like Enerpac's other gantries, it features self-contained hydraulics and electrics and is operated by Intellilift wireless control.

EXPRESS BLOWER™

The ultimate machines in pneumatic conveying systems that allow the quick and efficient spreading of large quantities of aggregates, compost, soil blends, and mulches to distant or previously inaccessible areas. With the addition of the patented and exclusive Supplemental Injection System, your Express Blower™ unit becomes a versatile Terraseeding® machine. Seed a slope or a berm for erosion and sediment control; seed a lawn or athletic turf; all with one easy, calibrated process. It is the perfect system for all construction, erosion control, green roof, and landscape projects, saving time and valuable labor costs.

FINN CORPORATION

With working capacity tanks up to 3,600 gallons, FINN's complete line of HydroSeeders® is designed to meet the needs of extensive erosion control jobsites and demanding seeding applications. FINN continues to develop and adapt equipment to fit new applications from oil field and mine reclamation to fire suppression to the U.S. military. We've modified units with tracks, equipped them with special axles and tires, designed special frames, and even tailored a collapsible rail system to meet unusual height requirements. FINN Bark Blowers can also be customized on tracks rather than tires for off-road applications. FINN delivers performance and productivity.

GME

One of the world's most complete producers of Trench Shields and Trench Shoring Equipment, GME offers a range from a single hydraulic shore system, trench shields, slide rail systems, and the MD Brace system—the only hydraulic bracing system produced in North America. Through its distribution networks in North America, Europe and Australia, GME's products are found on numerous jobsites around the globe.

GPS INSIGHT

The leading technology supplier of GPS tracking software for construction fleets. GPS Insight allows customers to track vehicles, heavy equipment, and other high value assets. Using the GPS Insight Fleet Tracking Solution, companies realize a significant increase in efficiency, and gain insight into all aspects of their fleet operations. GPS Insight provides a highly flexible solution, which includes a wide range of customized reports, alerts, and other features that can be tailored to meet specific customer requirements, and ensure maximum return on investment.

INTEC VIDEO SYSTEMS

Having an especially high rate of incidents and fatalities, it's important that construction sites use the most reliable, durable, and trusted safety equipment. Intec Video Systems provides just that with its heavy-duty, high-performing, and waterproof video safety systems. Investing in the right camera system that features heavy-duty construction and a wide field of view will ensure the safety of everyone on the ground—all the time. The CVC500AHXL camera is a perfect fit for these specifications. Contact us today to learn about how it can help you see more on the jobsite.

ISUZU DIESEL

Isuzu Diesel introduces complete line of Tier 4 Diesel engines for industrial and commercial applications at ConExpo. Innovative technologies and a history of 20 million applications, Isuzu Diesel produces reliable, durable, eco-friendly, and technologically advanced engines in outputs from 15 hp to more than 500 hp, that can be customized to exact customer requirements. Supported by a distributor network of 300 service centers in North America for industrial, commercial, and marine customers.

OZTEC BACKPACK CONCRETE VIBRATOR

Equipped with a rotary throttle, ensures proper operating speed. The patented "RubberHead[®]" surpasses all standards for protecting epoxy coated rebar and is unequaled in consolidating concrete. Oztec offers the versatility of fully interchangeable steel and rubber vibrating heads and flexible shafts. Oztec electric and gasoline motors are the most powerful and reliable in the industry today. The patented Oztec "Rebar Shaker[®]" turns the entire length of rebar into a vibrator and consolidates concrete in both walls and columns better than any other method.

PETTIBONE

When you need reliable, durable equipment for the toughest demands, look no further than the Pettibone Heavy Equipment Group: Pettibone heavy-duty material handlers; ARDCO seismic exploration and off-road utility vehicles; Dynamic specialty biomass equipment; Barko forestry and scrap handling machines. Through a shared commitment to innovation and quality, these companies leverage their combined strengths to ensure each machine is among the most sophisticated and dependable on the market. From engineering to production to ongoing support, the Pettibone Heavy Equipment Group is dedicated to making equipment that consistently works harder and lasts longer.

POSEIDON BARGE

Introduces the POSEIDON P10—Portable Sectional Barge. Standard units are 44'H x 11'W and 22'H x 11'W, spud pockets, and 60' spuds. The P10 barge is ideal for floating 250 ton to 300 ton cranes by reducing the foot print size of the overall deck in the water. The POSEIDON P10 has the size of a deck barge with the Sectional Barge trucking to inland lakes and waters. The P10 boasts the patented 20,000 pounds per square foot deck strength, single pick lifting point, equipment tie downs, deck hatch, zinc anodes, and coated interior.

PRO-TEC EQUIPMENT

A division of Trinity Shoring Products Inc., Pro-Tec Equipment is a leading producer of trench shoring and shielding equipment. We offer a wide range of products from steel and aluminum trench shields, hydraulic shoring, slide rail shoring, modular aluminum trench shields, temporary bridges, and the NEW Pro-Brace hydraulic bracing system. With a distributor network spanning the globe, our equipment is found on five different continents.

STRATA WORLDWIDE

HazardAvert[™] proximity detection and collision avoidance system is designed to prevent accidents by detecting a person or vehicle entering a specifically marked zone around an operating piece of machinery. When a zone is breached, the system emits an audible and visual warning alert and can be programmed to slow or stop the machine automatically. HazardAvert is currently the only system with a proven track record for operating in working sections with multiple pieces of machinery and multiple workers. Every person in the working area is detected by every piece of operating machinery. It can be used in underground and surface environments.

www.strataworldwide.com/electronic-safety/hazardavert | Booth #90704

THUNDER CREEK

2014 introduces final Tier 4 emission standards requiring all high horsepower manufacturers to include the use of Diesel Exhaust Fluid which is creating some challenges. Thunder Creek Equipment's new DEF Transport Tote is a portable solution for handling DEF. Like all Thunder Creek DEF delivery solutions, this closed loop system maintains the purity of the easily-contaminated fluid using just one pump. The difference with this solution is that it fits in a standard truck bed. The DEF Transport Tote houses a 50 gallon DEF tank and Thunder Creek's patent-pending 2-in-1 DEF pumping system under a lockable, weather-sealed hatch.

TOWMASTER

T-70HT is a 35-ton Hydraulic Tail trailer designed to haul small or large equipment. This trailer has a double-hinged hydraulic loading ramp featuring a low angle so equipment will load easily. An optional deck ramp lets users load equipment on the upper deck. There are plenty of tie-down slots and D-rings for straps and chains. This trailer is equipped with a winch to pull non-working equipment onto the deck. Long-lasting and bright LED lights finish out the package. The T-70HT is ideal for rental fleets or contractors with a variety of equipment to haul.

www.towmaster.com | Booth #1295

TRELLEBORG

Brawler Solidflex tires are designed for the extreme. Brawler is the ultimate choice for operators that can't be bothered by downtime caused by tire flats. These solid Skid Steer tires are proven to outlast foam filled pneumatic tires 3 to 1. The patented Elliptical Apertures for improved ride quality. The CRT-800 Rubber Tracks last 50 percent longer than other tracks in their class. Trelleborg takes into consideration the tolerance required by each machine's roller system when designing the CRT-800 products. This assures that each track will fit, be easy to install, and is less likely to de-track.
