

2024 Buyers Guide

Demco

To address issues during the dump cycle, Demco's innovation led to the creation of the FLEX CORNER®. Historically, the tub's flexibility often resulted in broken corner welds. To counter this, Demco devised a method during the bulkhead-to-tub welding process. By pre-heating the joints for increased strength and not welding all the way to the corners, they allow for controlled flex, eliminating the problem of cracked corners.

CHANGE DUMP DIRECTION

One distinctive feature setting Demco Side Dumps apart is the ability for drivers to change the dump direction solely from the driver's side. This convenience has been highly praised by drivers, eliminating the need to circle around the truck and trailer to adjust all four corners, streamlining the process significantly.

STABILITY & DESIGN

In discussions about stability, there are four crucial points, particularly focusing on the design aspects of Demco Side Dump trailers:

1 The utilization of three pivot points rather than two ensures better weight distribution across the frame, facilitating a smoother dump and reducing frame vibration during transit. This design significantly minimizes stress on the frame.

2 The larger G-Rail serves to evenly disperse weight across the tub, preventing bowing from excessive weight. Additionally, it moves materials further away from tires, reducing potential damage.

3 Highlighting the lower positioning of the tub within the frame, which is a distinguishing factor in these trailers. While other side dump trailers often show space between the frame and the tub, our design eliminates this gap. This lower center of gravity enhances safety, ensuring smoother rides and preventing offside wheel hop

4 The integration of press brakes within Demco's tubs is emphasized for their ability to allow materials to roll over themselves. Analogous to pushing snow, this design facilitates smoother and faster dumping, eliminating material avalanches that cause weight transfer leading to wheel hop and potential trailer tipping.

CORROSION INHIBITOR

When discussing paint features, the focus is on CORSOL Corrosion Solutions, the corrosion inhibitor. This technology ensures that if there's any damage to the body of the trailer, rust will be contained to that specific spot and won't spread, undercut, or blister. This feature significantly prolongs the trailer's aesthetic appeal, maintaining its appearance for a longer duration and ensuring a higher trade-in value. ■

DEMCO

FULL CLEANOUT. UNMATCHED STABILITY.

THREE PIVOT POINTS FOR STABILITY: By using three pivot points instead of two, weight is more evenly distributed across the frame. This minimizes frame stress, ensuring smoother dumping and reduced vibration during travel for increased stability.

ENHANCED G-RAIL DESIGN: A larger G-Rail ensures better weight dispersion across the tub, preventing bowing under heavy loads. It also minimizes potential damage by moving materials farther from the wheels.

LOWER TUB POSITION FOR SAFETY: Demco's lower tub placement reduces the gap between the frame and the tub, resulting in a lower center of gravity. This feature provides smoother, safer rides without offside wheel hop.

CONTROLLED DUMPING WITH PRESS BRAKES: Press brakes in the tub facilitate controlled material movement during dumping. Similar to pushing snow, this controlled release allows for smoother, faster, and cleaner dumping, preventing sudden weight transfers that could cause instability or tipping.

Why consider Demco
Side Dump Trailers?

Express Blower, Inc.

The Inventor. The Innovator. The Standard.

Express Blower, Inc. leads the pneumatic blower truck market with innovation, state-of-the-art systems, and practical experience, resulting in a greater number of large-size machines working in the field today than any other manufacturer. The mantra, “We are selling a business, not just a piece of equipment,” is ingrained in Express Blower’s® culture and is reflected in the equipment and customer service provided to our customers.

The leading blower truck manufacturer for nearly 30 years.

PRODUCTIVITY AND EFFICIENCY

With Express Blower machines, you can reduce the number of workers required for labor intensive and lower margin jobs, such as mulching. The rest of the crew is now available to do more profitable work, such as irrigation or landscape construction. EB equipment also helps take the seasonal nature out of many businesses’ workflow. While spring may be the busy season for landscape mulching, erosion control projects may pick up in autumn with work sometimes continuing throughout winter. Then there is year-round green roof material installation and playground safety surface “refreshing” before and throughout the school year.

Because of the machine’s production capabilities, you can naturally increase the number of jobs completed in a day while increasing your opportunity for repeat business by delivering a quick, consistent, professional service.

THE EB-60HO HIGH OUTPUT MODEL

Did we mention innovation? The newest member of the EB equipment family is the High

Output (HO) model designed around the tried-and-true EB-60 model. The EB-60HO is similar in blowing capabilities to our MD models and is the most powerful of our PTO configured machines. Lighter weight than any MD model and with greater capacity than a TM-45MD, the EB-60HO gives you better payload which means more money in your pocket! This machine also has better ground clearance than the standard EB-60, has no auxiliary engine for easier maintenance, and is available with our new 250-gallon water system.

THE DISTINCTIVE TR-HD

The model TR-HD is a compact trailered unit with all the power of the Express Blower full size TM-45HD and TM-70HD models. Aggregates and rooftop soil mixes can be blown vertically 20 stories or more depending upon product and project parameters. The TR-HD’s relatively small footprint makes it easy to maneuver in congested areas; perfect for urban green roofs or any project where there are continuous onsite loading capabilities. THE TR-HD: COMPACT. HEAVY DUTY. ROCK SOLID. See

www.expressblower.com/products for a complete listing of all available models.

UNLIMITED OPPORTUNITIERS

Save time. Save labor. Offer services that few companies can while providing your business with year-round revenue streams. EB makes it easier for you to expand your business and capitalize on high profit specialty applications like erosion control blankets and berms, green roof media installations, Terraseeding®, aggregate placement, and playground safety surface installation.

CUSTOMERS FIRST

Express Blower claims the industry’s most experienced and knowledgeable people in both sales and aftermarket product support and takes great pride in our superior customer service. Onsite training with equipment purchase, expert technical support, extensive parts inventory to maximize uptime and productivity, plus exceptional warranty coverage, are just a few of the reasons that EB continues to expand its customer base. ■

Express Blower, Inc. | 800.285.7227 | info@expressblower.com

www.expressblower.com

*Performance may vary depending on type and quality of material used, operator proficiency, and jobsite setup, requirements, and specifications. Express Blower, Terraseeding, and the Express Blower design logo are trademarks of Express Blower, Inc.

REVOLUTIONARY THE EXPRESS BLOWER® EB-60HO

YOU DON'T NEED MORE PEOPLE...

YOU NEED MORE MACHINE

INNOVATION. The most powerful of our PTO configured machines, the High Output (HO) models have similar blowing power as our MD machines. Lighter weight than any MD model and with greater capacity than a TM-45MD, the EB-60HO gives you **better payload which means more money in your pocket!**

Available as an EB-45HO, EB-60HO or EB-110HO.

Why an EB-60HO?

- It is an option to a proven system.
- Similar power to MD models.
- Greater capacity than a TM-45MD.
- Lighter weight than MD models.
- No auxiliary engine so less maintenance.
- Better ground clearance than the standard EB-60.
- Available with the **NEW 250 gallon** water system with controls.

Gorman-Rupp Pumps

Gorman-Rupp has been revolutionizing the pumping industry since 1933. Many of the innovations introduced by Gorman-Rupp over the past 90 years have become industry standards.

We continue to update our machinery, processes, research and development, and engineering to ensure that our pumps and systems are among the most reliable and efficient on the market. With nearly one million square feet under roof, our facilities house some of the most modern manufacturing, testing, and warehousing facilities in the world. Our experienced engineers take advantage of the latest technologies and innovations to custom-design, manufacture, and assemble our products.

With over one million Gorman-Rupp pumps installed to date, we have the knowledge and experience understand your specific application. We provide solids- and clean-fluid handling pumping solutions for municipalities, industrial plants, construction and rental businesses, refineries and petroleum plants, mining sites, agricultural operations and a variety of original equipment manufacturers.

One of our most successful and innovative lines of pumps has been our self-priming models. Gorman-Rupp also manufactures complete lines of submersible, priming-assisted (dry-prime), standard centrifugal, horizontal end suction centrifugal and rotary gear products built for the most aggressive pumping applications. In addition, our ReliaSource® pump packages that incorporate these products, are designed, manufactured, and tested and include pumps, motors, piping, and controls to ensure superior operation and easy installation.

We perform rigorous testing based on Hydraulic Institute Standards and test to customers' actual operating conditions in our one-of-a-kind testing facility guaranteeing innovative, superior-quality products that are ready to tackle your toughest jobs. To ensure you get the right equipment for your

requirements, Gorman-Rupp partners with a worldwide network of distribution and provides them with the most extensive training. Gorman-Rupp distributors will work hand in hand with you to recommend,

customize and specify equipment. And Gorman-Rupp is always available should you ever require any assistance.

PHILOSOPHY

Gorman-Rupp helps our customers solve pumping challenges by designing our pumps and pump stations to deliver decades of trouble-free operation and performance. When you choose Gorman-Rupp, you'll benefit from some of the lowest lifecycle costs in the industry and achieve maximum uptime and minimal service interruptions. And you'll enjoy one of the highest customer satisfaction ratings in the industry—guaranteed.

INDUSTRY LEADING SUPPORT & WARRANTY

Gorman-Rupp stands behind the quality of our pumps to ensure they meet your requirements for the long haul. To maintain industry-leading client satisfaction well beyond product installation, we offer a variety of services to meet your needs, including:

Training: We provide in-depth training seminars for technical and service personnel in our one-of-a-kind training facility. You'll learn about our products, technologies, and how to service your equipment.

Service: Because our equipment is designed for minimum maintenance and ease of service, maintenance is simple and cost-effective to perform in-house, and only minimal resources are required to keep our pumps and pump packages operating at peak performance.

Industry-Leading Warranty: Gorman-Rupp stands behind our products with some of the best warranties in the industry. Our manufacturing processes and rigorous testing standards result in a quality product you can rely on in the toughest applications.

CONSTRUCTION MARKET

We have built our reputation on the workhorses of the construction pump market: self-priming centrifugal trash pumps. These dependable, versatile performers help contractors move large volumes of water quickly. We also manufacture an extensive line of submersible and priming-assisted pumps used in sewage bypass, jobsites, and mines that offer maximum reliability, service life, and they don't come home until the job is done. ■

GORMAN-RUPP PUMPS

P.O. Box 1217 | Mansfield, Ohio 44901

NO MORE HOURS DOWN THE DRAIN. JUST WATER.
GUARANTEED

Our distributors are authorized to put a new Gorman-Rupp engine-driven contractor's pump alongside any other pump of the same size, type and horsepower, anytime, anywhere. Our pumps will work harder, faster and smarter, ensuring optimal uptime. If within 30 days of purchase, it isn't the best all-around pump, our distributor will accept the return of the Gorman-Rupp pump and offer a full refund. Guaranteed.

Isuzu Motors America, LLC

The Power Behind It All

Isuzu is known for reliable, eco-friendly, durable, and technologically advanced engines that power agricultural, construction, industrial, medical, and rental markets in the America's. All with quiet, fuel-efficient products for customer-specific applications.

PRE-VALIDATED RELIABLE POWER

Isuzu Pre-validated Open GenSet-Ready Power Units now come in three sizes: 4J, 4H, and 6H. As delivered, all are at least 90% pre-validated. The 4J-Series is equipped as a 3.0L, 4 Cylinder, 70.8 kW (95 HP) constant speed @1800 RPM Diesel engine. The 4H-Series is equipped with a 5.2L, 4 Cylinder, 127.5 kW (171 HP) constant speed @1800 RPM and the 6H-Series 7.8L, 6 Cylinder, 193.8 kW (260 HP) @1800 RPM. These are all Tier 4 Final Certified and branded under Isuzu REDTech™ (Reliable, Eco-Friendly, Durable, and Technologically Advanced Diesel Technology). Isuzu Open GenSet-Ready Power Units are built using all components and features necessary to successfully meet all installation testing criteria associated with long engine life while also maintaining optimized performance - Isuzu REDTech™ pre-validated Power Units have been engineered for use with several different generator manufacturers' products. These Engines carry one of the best warranties in the industry, 5 years/5000 hours

and their Power Unit Components offer 2 year/2000 hours limited warranty.

DURABLE AND ECO-FRIENDLY GENSET POWER

The standard power unit packages are engineered to include an air intake system with dual element air cleaner, exhaust gas after-treatment system, a complete cooling package, vibration isolators (engine and cooling package), and all engine filters.

The power unit engine control module and wiring harness incorporates oil pressure, coolant temperature, intake air pressure and temperature, and engine speed sensors and shutdowns. These complete power units can also be assembled to a customer supplied design of pre-validated skid base/generator combination, resulting in a 100% pre-validated Open GenSet Power Unit.

PRE-TESTED DURABLE POWER — SAVING ENGINEERING RESOURCES, TIME AND MONEY WHILE MINIMIZING INVENTORY

All models of Isuzu REDTech™ Open GenSet Power Units have also been designed with a generator ready skid base that has been 100% validated for one or more selected generator model/frame lines. If you use one of these complete (GenSet-Ready) Isuzu REDTech™ designs (power unit with cross member,

Isuzu Diagnostic Service Tool (IDST)

mounting/isolators and optional controller) with a pre-validated generator it is possible for immediate turn-a-rounds on inventory. In addition, various cross members for mounting as many as seven different common generator brands/models. When using a pre-validated 4J, 4H, or 6H Isuzu REDTech™ Open GenSet Power Unit, all that remains is a few days of vibration testing. This could also help reduce inventory by using pre-validated Isuzu REDTech™ Open GenSet-Ready Power Units that have been pre-engineered for several generator manufacturers' products.

TOOLS AND TRAINING RESOURCES

Isuzu offers a Diagnostic Service Tool, the IDST for diagnostic trouble codes and automatic Engine Identification which can read and clear ECM DTCs or read only DCU DTCs and perform a forced SCR purge. These tools are available through Isuzu Distributors and are very effective for trouble shooting specific engine related concerns that may not need major work or expensive downtime.

In an effort to support customer service requests, Isuzu is now offering Training programs through some of their Distributors, in certain parts of the country. This addresses a need for more hands-on training related to general maintenance or trouble shooting with turbo chargers, SCRs, and fuel injectors. All to better serve customer needs through qualified distributors using their expertise and Isuzu Genuine Parts for better service life. ■

Isuzu Commercial Truck of America, Inc.

Best-Selling Low Cab Forward Trucks in America

Isuzu Commercial Truck of America, Inc., is the distributor of Isuzu commercial vehicles in the United States—the best-selling low cab forward trucks in America every year since 1986.

There's a simple reason why these trucks have gained such popularity: Isuzu has the right truck for all your business needs.

EXTENSIVE LINE-UP

Isuzu offers the widest range of low cab forward trucks available:

Class 3-5 Isuzu N-Series V-8 gas trucks, driven by a powerplant with an engineered design life of 200,000 miles. These are the only low cab forward gasoline-powered trucks with GVWRs ranging from 12,000 to 19,500 lbs. Accommodating up to 20-foot bodies, Isuzu N-Series gas trucks are available in both Standard and Crew Cab configurations. Class 3 and 4 gas trucks available now; Class 5 gas models will be available in mid-2023.

Class 4 and 5 Isuzu N-Series diesel-powered trucks, equipped with the legendary Isuzu 4HK1-TC engine that boasts a B-10 durability rating of 375,000 miles. The trucks that made Isuzu famous are available in Standard Cab with three-across seating or a Crew Cab that will handle up to seven, and with wheelbases from 109 to 212 inches in length.

Class 6 and the all-new class 7 Isuzu F-Series trucks, featuring the most powerful Efficiency Series variant of the proven Cummins B6.7 diesel engine for the optimum in performance and economy. Isuzu F-Series trucks are available in both Class 6 and new Class

7 models with GVWRs from 25,950 to a whopping 33,000 lbs. With eight wheelbase choices, Isuzu F-Series trucks can handle bodies up to 30 feet in length.

Coming in early 2024: the Class 5 NRR EV, the all-new model that's everything you want in an electric truck and everything you expect from Isuzu. With a 19,500-lb. GVWR and the ability to travel (up to) an estimated 235 miles between charges, the NRR EV will change the game—and change your mind about electric trucks!

INCREASED PRODUCTIVITY

You can reach more tough-to-navigate locations and make more stops thanks to Isuzu trucks':

Maneuverability: Curb-to-curb or wall-to-wall, Isuzu trucks' cab-over-engine design gives them a turning circle dramatically tighter than any conventional cab.

Visibility: Between their low cab forward design and wide expanses of glass, these trucks allow drivers to see objects as close as eight feet ahead—far better visibility than you'd find in a conventional cab.

Economy: Fewer stops for fuel means more time moving your business forward.

LOW COST OF OWNERSHIP

Isuzu trucks are famous for their low cost of ownership, thanks to their efficiency and dependability, plus:

- Outstanding basic limited **warranty protection** for a minimum of 36 months,

with extended warranties available for as much as five years/250,000 miles

- **24/7 roadside assistance** for the length of your warranty or extended warranty
- Isuzu's **Priority Service Maintenance Program**, which allows you to lock in today's maintenance service prices for up to six years—and the cost can be included in your Isuzu Finance of America finance or lease contract
- Isuzu **FleetValue parts**, priced to compete with aftermarket parts but engineered to meet Isuzu's stringent specifications, in addition to **Genuine Isuzu OEM parts**
- **Vehicle Health Reports** produced by every Isuzu N-Series diesel truck, that show you idle time, speed history, acceleration frequency and more, so you can optimize your truck's efficiency by monitoring and making adjustments to driving habits

Isuzu Commercial Truck of America invites you to visit www.isuzucv.com or contact your nearest Isuzu dealership to discover for yourself all the reasons an Isuzu truck is the right truck for you. ■

ISUZU HIRE THE RIGHT TRUCK FOR THE JOB ISUZU N-SERIES GAS

CAREER OBJECTIVE

- To be the powerful, economical, versatile and durable low cab forward medium-duty truck for your business

SKILLS

- Superior visibility and maneuverability thanks to the Isuzu cab-over design
- A wide range of choices, available in classes 3 through 5
- Exceptional hauling capacity: GVWRs up to 19,500 lbs.
- Flexibility for your business needs: wheelbases from 109 to 176 in. for bodies up to 20 ft.
- Standard and crew cab options available, with seating up to 7
- Power to get the job done: 6.6L GMPT L8T (Gen V) 8-cylinder engine with 350 HP and 425 lbs. of torque and a six speed automatic transmission

EXPERIENCE

- The number one best-selling low cab forward truck in America since 1986

Poseidon Barge

Setting a High Standard for Supreme Quality

Poseidon Barge specializes in manufacturing Sectional Barges used in the heavy construction industry to float equipment, men, or materials. Poseidon's Sectional Barges are manufactured in Berne, Indiana, and are transported via truck. They are used primarily on inland waterways where traditional deck barges cannot travel.

BARGES OF ALL SIZES

Poseidon manufactures barges with hull sizes of 4, 5, 7, and 10 foot tall. The Poseidon P10 is the largest Sectional Barge available that can be transported over the road. Measuring 44 ft long x 11 ft wide and 10 ft tall, the P10 has floated some of the largest cranes available.

serve their customers with a premier product finish. Large enough to accommodate the P10 barge, they are some of the largest booths in the Midwestern United States. Each booth is equipped with a 25 ton crane for easy product handling.

CUSTOM MANUFACTURING

Heavy, custom manufacturing is offered as well. Weldments, plasma cutting, bending, and a variety of other fabrication services are utilized by Poseidon to give their customers a complete "one stop shop" experience. Poseidon also performs contract manufacturing, assembly and finishing for markets outside of the marine industry.

Poseidon Barge was the first Sectional Barge manufacturer to receive their ISO 9001:2015 certification.

Poseidon Barge offers patented roll form decks as well as standard diamond plate decks that are both rated for 25,000 lbs/square foot of concentrated load. Accessories for each specific product line are also available. Spuds, spud wells, deck cleats, rake sections, hydraulic double drum winches, Sea Bee Thruster units, and Push Boats are all part of the product line available for rent or purchase.

FULL ENGINEERING STAFF

Poseidon Barge has a full engineering staff led by an in-house certified Naval Architect. Layouts and Basic Stability Analysis are available for each project based on the information provided by the client.

Poseidon has in-house steel grit blasting and liquid spray-painting booths to better

Design and CAD services are offered through our engineering department.

CONTINUAL IMPROVEMENT

Poseidon Barge was the first Sectional Barge manufacturer to receive their ISO 9001:2015 certification, setting a high standard for supreme quality, repeatability, and focus on Continual Improvement. Poseidon prides itself on these principles providing the customer assurance that each and every barge section was built with the attention focused on these core values. Customer Satisfaction is paramount at Poseidon Barge! ■

Venturo[®] Service Cranes

Count on Versatility

Operating in tough work environments means you don't have the time to worry about whether you have the right equipment for the job. You need dependable performance, plain and simple.

Venturo[®] service cranes deliver on that need with a full line of versatile, made in the USA cranes in a variety of options to fit any application.

THE VENTURO LINEUP

With safety, strength and efficiency in mind, the Venturo lineup consists of cranes available in hydraulic, electric-hydraulic, electric light duty, van, and knuckle boom configurations. No matter what your fleet requires or what the job is, you can trust Venturo to provide the reliable, high-performing equipment you need to keep your projects on track.

EASY UPFIT

Designed as an easy upfit to an existing work truck or available in a custom solution package with the features you want to fit your job's specific needs, Venturo cranes provide the flexibility and durability that even the most unique work environments demand:

- Sturdy, steel construction
- Venturo Logic Controls™ (VLC) remote control system for safety and ease of use *
- All-day winch run time *
- Multi-function capability including winch, elevation, rotation, and extension
- Proportional control
- Various sizes for flexible service work
- Portable and simple to mount
- Wide range of lifting capacities
- Boom lengths up to 30 ft
- Multiple options from light to heavy-duty, van-mounted, and knuckle boom

**Standard feature on all hydraulic cranes*

Venturo service cranes are manufactured in Cincinnati, Ohio, USA, and are designed for ease of operation and rugged dependability in multiple industries including construction, oil & gas, propane, agriculture, government/municipalities, and more.

All Venturo service cranes meet ANSI B30.5 and OSHA 1910.180 specifications. Some of Venturo's most popular and well-regarded service cranes for multiple markets:

HT40KX: Hydraulic telescoping crane rated at 40,000 ft-lbs with a 6,000 lb capacity and 20-25 ft reach

HT45KX: 7,500-8,000 lb capacities, rated up to 45,000 ft-lbs with a maximum reach of 30 ft

HT66KX: Venturo's flagship crane; rated at 66,000 ft-lbs with a 25 ft reach and a capacity of 12,500 lbs

HT60KX: Rated at 60,000 ft-lbs with a 30 ft max reach, the HT60KX protects against overload with the VLC™ Electronic Crane Control Management System

When it comes to quality, there is no room for compromise. Venturo stands on more than 70 years of the best-in-industry gear with fast turnaround times to get you what you need when you need it most. ■

To see the full line of Venturo service cranes in all configurations, visit venturo.com or call 800.226.2238.

BUILT STRONG BUILT READY

Keep your operation on track with tough equipment you can depend on. From single-truck crane packages to full fleet upfits, Venturo's made in the USA service cranes, hoists and truck bodies are built to handle every challenge on any job.

FIND WORK-READY EQUIPMENT AND REAL EXPERTISE
AT [VENTURO.COM](https://www.venturo.com).

VENTURO hydraulic, electric-hydraulic, crane solutions and **VENCO** underbody conversion/dump hoists are all manufactured with pride by skilled US craftsmen. **VENCO VENTURO** is also the official US distributor for FERRARI articulating knuckle boom cranes.

Antraquip Corporation

Antraquip Corporation is North America's only manufacturer of hydraulic rock and concrete cutters (drum cutters), carbide and diamond saw attachments, and soil remediation equipment. Antraquip cutters are the ideal alternative to hydraulic hammers for many applications including trenching, controlled demolition, scaling, soil remediation, tunneling, underwater cutting, and general rock excavation. As the North American rock excavation experts, AQ attachments are designed to operate even in hard rock conditions which are so common in the US and Canadian markets, while overseas competitors are limited with their design for soft rock applications only. Call AQ today for free consultation and demo to confirm production goals will be achieved. Some

advantages and features of Antraquip attachments include:

- Numerous models available for excavators ranging from 1 – 180 tons
- Choice of cutter head styles to suit the application
- AQ line equipped with a high-torque, low-speed hydraulic motor with rugged gearing and symmetrically aligned cutter bit patterns insures maximum productivity
- Water spray dust suppression system
- Integrated mechanical rotation units with options for 360 degree fully hydraulic rotation

B2W Maintain

B2W Maintain is a Computerized Maintenance Management System (CMMS) that connects shop, field and management teams and helps them maximize equipment utilization and cut maintenance costs. The software manages all aspects of the maintenance process, drives preventive programs and provides enterprise-wide access to equipment status and history in real time.

A customizable dashboard provides managers and executives using B2W Maintain with an easy-to-read snapshot of maintenance activities and metrics, with the option to drill down for details.

Within the application, users plan work for maximum efficiency and minimum downtime by grouping multiple repair items together and assigning appropriate codes, parts, and estimated hours before approving the work to

be completed by a mechanic. Users can drag and drop work orders on the schedule, click for details and create or assign work orders on one screen. Schedule and telematics data, combined with a view of equipment locations and associated work, allow managers to optimize the efficiency of mechanics.

They can also choose to view the schedule of maintenance activities for one day or multiple days and toggle easily between mechanic-centric and equipment-centric views.

Contractors use B2W Maintain to set up recurring preventive maintenance based on custom defined meter- or calendar-based triggers. They can also apply preventive maintenance templates based on company-specific or manufacturer-recommended maintenance schedules for multiple pieces of equipment. This automated scheduling

and notification of the preventive work helps to ensure that it is done at the proper intervals, reducing costs and preventing unexpected breakdowns.

The B2W Maintain mobile tablet mechanic application makes it easy and efficient to communicate rich data in real time and to create and fulfill repair requests and work orders in the shop or in the field. Mechanics can also access documentation and submit timecards. ■

Maximize Equipment Utilization

BKT

BKT has more than 3,200 quality products and distributes to over 160 countries on five continents.

BKT, Balkrishna Industries Limited, is an international off-highway tire manufacturer headquartered in Mumbai, India. Since 1987, BKT has focused on specialty off-road tire segments such as construction, agricultural, industrial, mining, lawn and garden, ATV, and forestry. BKT has invested in state-of-the-art technology and innovative product design to meet the most demanding needs of the user. BKT has more than 3,200 quality products and distributes to over 160 countries on five continents.

QUALITY AND INNOVATION

BKT is a family owned company driven by ambitious innovation and a strong bond with their partners. They share the idea of a great team in which everyone pulls in the same direction. Quality and innovation are some

of BKT's strength because of consistent and continuous investment into Research and Development, as well as into tire technology, tire machinery, and advanced tire manufacturing processes.

R&D FOCUSED

There are five state-of-the-art manufacturing plants in India and three business unit subsidiaries in the United States, Canada, and Europe. The advanced Research and Development Center in Bhuj studies product design and development, as well as sustainable materials. There is a test track and facility where all tires undergo 500 tests throughout the production cycle. BKT has even built their own Carbon Black plant and lab to produce quality raw materials to use in their tires.

SPORT SPONSORSHIPS

Their passion for team and sports has led to sponsoring many sports organizations worldwide. Monster Jam, many European soccer leagues, rugby, basketball, curling, and cricket are the main focuses of BKT's sponsorship. The goal is to support the customers not only through their business but their passions.

WE CARE FOUNDATION

BKT heavily invests in CSR activities through the "We Care" Foundation. Their focus is on health-related initiatives and supplying food to the needy. ■

For more information, visit bkt-tires.com.

A LONG WAY TOGETHER

EARTHMAX SR 41

No matter how challenging your needs, EARTHMAX SR 41 is your best ally when it comes to operations that require extraordinary traction. Thanks to its All Steel radial structure and the special block pattern, EARTHMAX SR 41 provides excellent resistance against punctures and an extended service life. In addition to long working hours without downtime, the tire ensures extraordinary comfort.

EARTHMAX SR 41 is BKT's response to withstand the toughest operating conditions in haulage, loading and dozing applications.

Compliant Client by eMARS

Before the advent of a web-based, easy-to-use payroll system, the Department of Labor and contractors responsible for Davis Bacon compliant payrolls “estimated their compliance” via a random sampling.

Mr. Kenn Umlauf, a retired project engineer for the Florida Department of Transportation said, “The federal government funded some of our projects. The feds have their rules and regulations, including the Davis Bacon Act. So, on a federally funded contract we used a random sampling of approximately 15% of employee checks, which represented the federal requirements.”

Mr. Umlauf continued: “Twice a month, 15 employee checks of the 60 to 70 workers were inspected to make sure

that the prevailing wage and compliance issues were upheld. I assure you; we were diligent.”

What does Mr. Umlauf think about the eMARS system? “Technology that is easy to use and very accurate is worth the cost.”

Many construction companies still manually prepare their payroll. Users report that eMARS/Compliant Client represents an 80% savings in time and money. eMARS/Compliant Client is used by over 48,000+ companies.

The system is easy to use. It provides immediate, concurrent, real-time visibility of all payroll records of the sub, prime, plus the owner agency. All screens are printable. Every submitted payroll is audited, online and in real time, against the wage determination, and all 30 causes that

are in support of Davis-Bacon and Related Acts. The results of these comparisons to the provisions set forth in the act are immediately reported, allowing for quick corrections.

Compliant Client requires a PC and less than 30 minutes of training. Complete implementation takes less than one day after loading the wage determination. Compared to paper and pencil preparation, the eMARS system represents an 80% productivity improvement, plus recognition of payroll errors that prompt the user how to solve the problems ■

Humboldt Mfg. Co.

Humboldt Mfg. Co., located in the United States, is a long-standing, leading manufacturer and supplier of testing equipment used for evaluating construction and civil engineering materials. Our equipment is used extensively throughout the world for testing soil, concrete, cement, asphalt, and aggregate materials.

Humboldt began operations in 1909 as a manufacturer of cement testing equipment in the Humboldt Park neighborhood of Chicago, Illinois; establishing from the beginning, a solid reputation for producing high-quality, scientific products, as well as providing excellent customer service.

Since 1990, under the direction of Dennis Burgess, Humboldt has consistently grown, introducing new equipment, expanding into new testing equipment markets. During

these years Humboldt has transformed into the company we are today—employee-owned and, focused on the development, manufacturing, and distribution of construction materials testing equipment throughout the world. Humboldt is known for manufacturing high-quality, competitively-priced equipment primarily designed to comply with ASTM and AASHTO testing standards, as well as other global standards.

Through our website, Humboldt's customers have the advantage of being able to browse the testing equipment they need and order directly from us. Our inside sales team is also available, for those who want to speak directly with a person. Our sales team have years of industry experience and are available during working hours. Our corporate offices are located in Elgin, Illinois, and Raleigh, North Carolina.

Since 2003, we have maintained a quality management system in accordance with ISO standards. This system is based on the constant monitoring and continuous improvement of the company's processes and products. Currently, Humboldt maintains ISO certifications for ISO 9001: 2015 and ISO/IEC 17025: 2017. These certifications can be viewed on our websites: www.humboldtmfg.com and www.humboldtscientific.com. ■

*As Humboldt goes forward,
our focus will be on
the continual improvement of our
testing equipment and maintaining
diligent customer service equipment
for their needs, as well as help
with installations and training.*

InSite Software

Jeff Pitzer from Civil Works LLC is a successful earthwork estimator for hire based out of Charlotte, North Carolina. Most of his work focuses on residential, highway, industrial sites, and shopping complexes.

Before founding Civil Works LLC, Jeff had the opportunity to learn and use several earthwork takeoff systems. When he started Civil Works LLC, Jeff chose InSite's Elevation Pro for its ease of use, value for the money, and outstanding customer service.

Ease-of-Use: Jeff needed to learn Elevation Pro quickly. After attending a one-hour comprehensive training class, Jeff was quickly running the software with confidence. Within two projects, he cut his takeoff time in half, empowering him to take on more bids and boosting his bottom line.

Value for the Money: The features Jeff values the most are the ability to read CAD files and vector PDFs, toggle layers on and off, and live 3D views. "The ability to see the plans in 3D helps me avoid costly mistakes," says Pitzer.

His customers value the reports he can generate with InSite Elevation Pro, such cut and fill, subgrade, stripping, and area and length. "My customers love these reports, and I have garnered loyalty and repeat customers."

Customer Service: "Your team is great," says Pitzer. "They are patient when I have questions and point me to resources in the manual for future reference."

When asked if he would recommend Elevation Pro, Pitzer replies, "Elevation Pro is worth the investment. It is easy to learn, easy to run, and delivers accurate takeoffs." ■

Visit us at www.insitesoftware.com/demo, email sales@insitesoftware.com, or call 877.746.7483 to request a live demo. Let us show you how InSite Elevation Pro gives you the tools to bid with confidence.

Ligchine

Ligchine is a global leader in innovative laser-guided and 3D LPS-guided concrete screeds. Since its founding in 2007, the company has rapidly expanded its position in the market and offers a full line of automated concrete screeding machines that service flatwork companies from small owner-operated companies to large global concrete contractors.

WHAT WE DO

We design and manufacture reliable and cost-effective concrete leveling machines known as “laser-guided screeds.” Ligchine is an industry leader with our “boom-operated screeds” for slab-on-grade screeding applications. Our screeds are developed for commercial flat work and exterior paving and can dramatically reduce dependence on labor, which is often

in short supply, while yielding a higher-quality end product.

WHO WE SERVE

Our customers are concrete flat work contractors of all sizes performing specification-driven work that demands first-rate Floor Flatness (FF) and Floor Levelness (FL) results. Our screed machines enable our customers to be more competitive and profitable in a highly competitive construction market.

OUR MACHINES

We offer an extensive line of SCREEDSAVER™ Laser Guided Concrete Screeds including the ULTRA PLUS, ELITE, MAX PLUS, and the electric MAX PLUS E. Another key product in our line is the E-Z PLACER, a self-propelled,

remote operated concrete placer and line dragger in a single, easy to transport unit.

The company’s headquarters, engineering, and manufacturing are located in the United States, and in addition to a direct sales force in the US, the company has an extensive network of international dealers and partners to serve customers anywhere in the world. ■

MAX

Since our inception, MAX has harnessed the winds of change and emerged as an unrivaled global force in the realm of industrial tools. We're not just a manufacturer; we're the trailblazers, constantly pushing the boundaries of what's possible.

INNOVATION MEETS ENDURANCE

At MAX, our team of product engineers is dedicated to crafting high-end industrial tools that cater to the ever-evolving needs of professionals. Our philosophy centers on innovation and durability, ensuring that the solutions we provide stand the test of time.

The MAX Advantage isn't just a catchphrase; it's our way of life. Our journey begins with our R&D, engineering, and production teams and culminates with you, our esteemed customers. Through direct

feedback and close collaboration, we adapt and elevate our products to meet the real-world demands of those who depend on them.

In the industrial arena, MAX excels in producing rugged, lightweight tools featuring groundbreaking patented innovations. From pneumatic nail guns to robust 100/500 PSI compressors and precision steel & concrete tools, we are at the forefront of the construction industry.

LEADING THE WAY

Our accolades attest to our dedication to excellence. We pioneered the world's first roofing nailer in 1982, followed by revolutionary battery-operated rebar tying tools.

We set the benchmark for Precision, Speed, and Performance in rebar tying with the Twintier® product line, delivering unparalleled efficiency with reduced wire usage.

All MAX products are meticulously crafted in ISO9001 and ISO14001 certified facilities, upholding our unwavering commitment to quality. ■

Mi-T-M

Contractors rely on equipment to get jobs and projects done quickly and efficiently. Mi-T-M's inverter generators range from 2000 up to 7300-watts and are built with inverter technology, making them powerful, quiet and fuel efficient. These inverters feature CO detection and automatic shutdown, providing added safety during operation.

The 2000 and 2500-watt inverters have a compact, hand-carry design, making them easy to move where power is needed. With a host of universal outlets, these generators are great for powering tools, as well as charging battery packs and electronics.

Time is money and the 3500-watt inverter generator's unique open frame design makes maintenance and portability quick and easy. It only weighs 66 pounds and can easily fit in a service truck compartment when it's not being used.

The Mi-T-M 4000-watt inverter is extremely quiet with a 56 decibel rating. It features all universal outlets as well as dual USB ports. And the 7300-watt inverter is equipped with gripped handles, durable tires and a 5.5 gallon fuel tank to run for more than nine hours at half load.

All inverters come with 1-year alternator and 3-year engine warranties, feature a Mi-T-M OHV engine and can be used to power numerous tools for both large and small jobs. ■

National Construction Rentals

National Construction Rentals understands the relationships we build are just as important as the quality of work we put into each project. It's with this principle in mind that has made us become the largest supplier of Rent-A-Fence, barricades, portable toilets, hand wash stations, luxury restrooms, and mobile storage containers in the nation.

For more than 60 years, National Construction Rentals has worked with every leading construction company, supplying temporary site service solutions to Bechtel, Flour, Kiewit, Turner, PCL Construction, The Shaw Group, Skanska USA, Clark Group, Jacobs, Foster Wheeler AG, The Walsh Group, Balfour Beatty, Whiting-Turner, Tutor Perini Corp., CB&I, Gilbane, Hansel Phelps, Mortenson Construction, McCarthy Construction, and countless others.

Unparalleled Service

From commercial and residential construction, to government projects, public works, and emergency response, National's team of experienced professionals dedicate themselves to each project until each customer is satisfied with the results. This was our goal when we started in 1962. This is what continues to define who we are today. ■

Reef Industries

For more than 65 years, Reef Industries has been manufacturing and fabricating reinforced film laminates and composites. Reef Industries specializes in custom plastic laminates that safeguard and prolong the service life of customers' investments. Products range from covers that protect equipment during outdoor storage to underground marking tape that ensures buried utilities are protected from accidental dig-ins.

Each year, countless building owners suffer the problems associated with material and systems failures due to moisture. Reef

Industries' Griffolyn® vapor barriers and vapor retarders can prevent water vapor from causing poor insulation performance, structural damage, and other moisture-related problems. Also, our Transguard® concrete slab floor protection sheets temporarily protect slabs from latent damage during construction and remediation projects. Damage to newly poured concrete or decorative colored floors caused by construction traffic can be extremely costly. The Griffolyn® polyethylene vapor retarder system and Transguard® slab floor protection offers the complete building solution. ■

Reef Industries provides customers with dependable and proven high-quality materials for long-term performance.

Roadware Inc

The toughest equipment on concrete demands the toughest repairs. When a national heavy equipment dealer wants a serviceable floor again, they turn to Roadware 10 Minute Concrete Mender™ and surface polishing. Roadware 10 Minute Concrete Mender is a structural polyurethane that applies at an almost water thin 8cps and penetrates deep into concrete slabs and surfaces. It injects itself into the pours of the

damaged concrete, making a tough polymer concrete repair that does not become brittle and pop out like epoxies. With a surface tension 1/3 of water, the Microdoweling™ Concrete Mender slips past bond-lines and grabs onto the rock in the concrete slab.

Grind and polish ready in only 10-15 minutes, polishing contractors can prepare, degrease, repair, grind, grout, and polish a heavily damaged floor over a weekend.

Concrete Mender™ may be applied in a wide temperature range from well below zero F to 100 degrees F. It grinds and polishes easily without melting or smearing into the surrounding concrete.

ROADWARE 10 MINUTE CONCRETE MENDER

Roadware 10 Minute Concrete Mender is made in the USA by Roadware Incorporated in Minnesota and is available worldwide through Roadware's distribution network. Available in 600ml 2K cartridges, two-gallon bulk kits, and ten-gallon bulk kits. ■

For more information, visit
www.concretemender.com
or call 651.457.6122.

Roadware 10 Minute Concrete Mender is a structural polyurethane that applies at an almost water thin 8cps and penetrates deep into concrete slabs and surfaces.

Would you repair and polish a floor like this?

This heavy equipment service bay was fully repaired and polished over the weekend using the Microdoweling™ technology of **ROADWARE 10 MINUTE CONCRETE MENDER™**.

ROADWARE 10 MINUTE CONCRETE MENDER™ is the only structural polyurethane with a Microdoweling™ surface tension less than water. It penetrates deep into concrete to create tough repairs that won't pop out like brittle epoxies. Repairs tough enough to support bulldozers, compactors, and other machines designed to rip concrete apart.

Rooster

The Rooster Asset Tracking System is the industry's first equipment management tool that captures every minute of equipment activity and automates reporting for as little as \$1.00* per month.

The Rooster Asset Tracking System consists of Rooster Hubs, Rooster Activity Trackers, and the Rooster App portal. Rooster Hubs are robust data portals that connect to the Cloud through an integrated cellular connection to deliver equipment activity and telematics data, and accurate GPS location every 8 minutes.

Rooster Activity Trackers are small, rugged devices that, once installed to any piece of equipment, capture activity on a minute-by-minute basis, for up to 5 years. They transmit data to Rooster Hubs up to a half mile away, or through most concrete and metal to a nearby

Hub using a long-range, low-power pairing protocol based on the LoRa® communications standard and protected by more than a dozen patents issued and pending.

Rooster offers an introductory "Asset Tracking Starter Kit," which includes a Rooster Hub and its AC and Flying Lead power adapters, four Rooster Activity Trackers and a set of four mounting options. With a self-service, order-on-demand sales model, customers only pay for activated devices managed through the free Rooster Mobile App, which is available on Google® Play and Apple® App Store. Expanded Rooster System packs, bulk pricing and a variety of accessories are available on rooster.com.

Rooster offers, help videos, live customer support, and referral to deployment partners by calling 844-4ROOSTR (476-6787).

With Rooster, contractors with equipment and fleet inventory of all sizes can manage assets more effectively; export succinct, reliable reports that backup time and materials billing; and create utilization reports that help determine whether to rent, sell, or buy. ■

For more information, visit www.rooster.com.

* Rooster Activity Tracker subscription is \$1.00 (USD) and Rooster Hub subscription is \$10.00 (USD) per month. At least one Hub is required. Cost of equipment varies, visit rooster.com/products for more details.

STUDSON

STUDSON, the North American safety helmet innovator, recently introduced the SHK-1 Full Brim Safety Helmet in pursuit of creating a safer and more technologically advanced industrial safety helmet. The SHK-1 Full Brim Safety Helmet represents the first of its kind to provide superior head protection from injury and the outdoor elements.

In the U.S. construction industry, 68% of TBIs¹ are caused by work-related falls, yet traditional hard hat systems are only designed to protect against falling objects, leaving a significant safety gap that STUDSON addresses.

The safety helmet is designed to help prevent injury from impacts to the front, back, sides, and top of the head, featuring technologies to absorb impacts from trip,

slip, and fall-related accidents on the job. It is the only full-brim safety helmet that complies with American National Standards Institute (ANSI) Z89.1 Type I and II safety standards.

Existing Type II safety helmets were only available in the climbing-style form factor, which provides less protection from the sun and rain compared to full-brim helmets. The full-brim style also appeals more to seasoned tradespeople who are most comfortable with a brimmed helmet.

The SHK-1 Full Brim features Koroyd welded tube polymer which provides 360-degree head protection for absorbing impact and improves heat dissipation and venting via its cellular-structure design compared to traditional EPS foam. Furthermore, the embedded Twiceme

technology digitally integrates a wearer's vital health data within the helmet. In the event of an emergency, the data is accessible via a smartphone NFC chip reader viewable through an SMS text message or the Twiceme app.

Founded in 2019, STUDSON has quickly disrupted the head safety market. Since shipping its first safety helmet in 2021, STUDSON has supplied more than 100,000 across North America, including to some of the largest commercial general contractors in the United States. ■

Lind Equipment, a renowned global manufacturer with more than 70 years of experience, specializes in portable LED lighting, industrial work lighting, portable power, and static grounding solutions for industrial and hazardous locations. Trusted worldwide in challenging environments, Lind serves militaries, construction sites, oil refineries, mining companies, and various industries.

Introducing the **Beacon 980 Hitch Light**, a revolutionary jobsite lighting solution. Its innovative design eliminates the need for cumbersome equipment, offering a lightweight and portable alternative for on-the-go projects. Featuring a mast with two light heads, it delivers 60,000 lumens, ensuring well-lit work areas. What sets it apart is its easy attachment to your truck's hitch, simplifying installation. Just plug it into the standard 120v outlet in most modern trucks, and you're good to go.

Bid farewell to heavy, unwieldy lighting setups, and welcome the convenience of the Beacon 980 Hitch Light. With LED lights lasting over 50,000 hours, you'll enjoy reduced downtime and a lower total cost of ownership. ■
